Broadcast is the essential source of business information about the British TV industry, at home and around the world. It sits at the heart of the industry, serving large and small production companies, the post-production community and the UK's PSB and commercial broadcasters. We are also a leading authority on TV around the world, and the powerful emerging digital players such as Netflix, Apple, Facebook and Amazon.

// Broadcast monthly //

We have played a leading role in the drive for TV to improve its gender balance and its wider diversity, and *Broadcast* has led the debate over the future of the BBC. We operate a news-led website, with two daily email alerts, and publish a prestigious monthly magazine that delivers deep and rich analysis of the industry. Our journalism is fast, accurate and independent and we are the key forum for debate in the TV industry.
